

Full Name	Sakugawa Joanna Rocio	Nationality	Argentine
Date of Birth	January 9, 1994 (32 years old)	Location	Minamikurihashi (南栗橋), Kuki City, Saitama 349-1117, Japan
Contact	Mobile: 070-9294-0470 / Email: jrsakugawa@gmail.com		

EXECUTIVE SUMMARY
Software developer with 6+ years of experience specializing in frontend development with React, Angular, and TypeScript. Experienced in building scalable UI architectures, reusable design systems, and integrating REST APIs. Fullstack experience developing REST APIs with Java (Spring Boot) and .NET. Proven ability to collaborate effectively within Agile teams. Currently based in Saitama, Japan with full work rights.

Gire S.A. (Full-Stack Engineer)

Period: July 2025 - November 2025 | Location: Buenos Aires City, Argentina

Key Responsibilities:

- Helped refactor legacy systems into modern React frontend setups.
- Built payment features and system modules for QR codes, cards, and POS terminals.
- Developed frontend features that connect to REST APIs and tested APIs using Postman.
- Built backend REST API endpoints using Java and Spring Boot.
- Set up and tested local development environments for Redis, databases, and login services using Docker.
- Worked with team members across different roles using Scrum.

Nonconformist (Frontend Engineer)

Period: April 2024 - June 2025 | Location: Buenos Aires City, Argentina

Key Responsibilities:

- Built the Andina ART website from scratch with React and Bootstrap, matching Figma designs closely on tight deadlines.
- Created reusable UI components to reduce duplicate code and make maintenance easier.
- Built a component library for Banco Macro's online banking app to standardize design and help the team code faster.
- Documented component designs in Storybook so designers and developers stayed on the same page.
- Organized SCSS styling with Design Tokens and CSS variables to make theme updates simple.
- Built responsive layouts that work smoothly on all devices, getting positive client feedback on project quality.

Huenei IT Services (Frontend Engineer)

Period: March 2023 - March 2024 | Location: Buenos Aires City, Argentina

Key Responsibilities:

- Built and maintained web apps for trade management, customer support, sales, and financial services.
- Created new user interfaces and mobile-friendly layouts based on Figma prototypes.
- Added new screens and tools for business operations and data management.
- Found and fixed software bugs to improve app stability and speed.
- Connected frontend screens to .NET and Java backend services.
- Worked with cross-functional team members in a Kanban workflow.

FYO (Frontend Engineer)

Period: December 2021 - February 2023 | Location: Santa Fe, Argentina

Key Responsibilities:

- Built and updated internal company web apps with user permissions and data screens.
- Added new UI features and improved existing screens across complex application pages.
- Delivered responsive and easy-to-use screens based on Adobe XD prototypes.
- Created data tables and grids that handle large amounts of data smoothly.
- Maintained shared UI components to keep app design consistent and clean.
- Wrote unit tests using Jasmine, managed app setups in Azure DevOps, and reviewed team code.
- Worked closely with Product Owners, designers, and developers in Scrum cycles.

- Worked as a full-stack developer using ASP.NET, .NET Core, and SQL Server for a US client (Bcycle).
- Built and optimized web screens with HTML, CSS, JavaScript, and React, focusing on app quality.
- Fixed bugs, improved app speed, and managed code updates and tasks in Azure DevOps.
- Set up local development environments using Docker.
- Helped build a new web app for WarnerMedia, making responsive screens from Figma and creating content tools.
- Worked with team members in an Agile environment using Jira.

EDUCATION & LANGUAGE QUALIFICATIONS
Computer Programming Technician National University of Lomas de Zamora Aug 2022 – Aug 2025 6th Year English Language & English B2 Certificate Cambridge International School of English Dec 2012

TECHNICAL SKILLS
Frontend • Angular (v7–v18), React (v18–19), TypeScript, JavaScript, Next.js, RxJS, Redux, HTML5, CSS3, SASS/SCSS, Material UI, Bootstrap, Angular Material Backend & Databases • Java, Spring Boot, Maven, C#, .NET Core, .NET Framework, ASP.NET MVC, SQL Server, MySQL, PostgreSQL Testing, Tools & Methodologies • Jest, Jasmine, Unit Testing, Git, GitLab, Bitbucket, Azure DevOps, Docker, Postman, Jira, Trello, Figma, Storybook, Agile, Scrum, Kanban Languages & Visa • Spanish (Native), English (Upper-Intermediate / B2 Certified), Japanese (Elementary) • Visa Status: Long-Term Resident (定住者), No work restrictions

PROFESSIONAL SUMMARY (SELF-PR)
I am a dedicated software engineer with over 6 years of experience building responsive web and mobile applications. I take pride in being a proactive and reliable developer who takes ownership of my work, tackles challenges with determination, and continuously looks for ways to improve. Throughout my career, I have specialized in transforming Figma and Adobe XD designs into pixel-perfect, user-friendly interfaces, developing reusable UI component libraries, and building CMS applications for enterprise clients. I also take ownership of full-stack features, developing REST APIs with Java (Spring Boot) and integrating them with .NET services.

CAREER GOALS & MOTIVATION
Having recently relocated to Japan, I am excited to build my career here and become part of a team where I can contribute, learn, and continue growing as an engineer. I have developed a strong passion for frontend development and creating intuitive, reliable, and user-focused applications. I enjoy solving problems, learning new technologies, and constantly looking for ways to improve both my work and myself. I am eager to bring my experience, curiosity, and commitment to a collaborative team in Japan, while taking on new challenges and growing together with the company.
